About Me

I'm an **entry-level IT professional** with a BSc (Hons) Computer Science from the University of Hertfordshire (2025), with practical experience in technical support, cloud technologies, and system automation.

I hold **Microsoft Azure Fundamentals (AZ-900)** and am working toward **CompTIA A+**. My GitHub showcases real projects covering networking diagnostics, system monitoring, and help desk tooling.

Outside of tech, I work night shifts as a Care Assistant — sharpening my ability to stay calm under pressure, communicate clearly, and work autonomously.

Microsoft Azure AZ-900 Certified	Windows 10/11 Support & Config
Networking TCP/IP, DNS, DHCP	Python Scripting & Automation
Bash Sysadmin Scripts	Active Directory User & Group Mgmt
Remote Support RDP, Teams, Jira	Linux Fundamentals

Certifications

**Azure Fundamentals
(AZ-900)**
Microsoft Certified

✓ Completed

**CompTIA A+ (220-1201
& 1202)**
CompTIA

In Progress – 2026

Networking Essentials
Cisco Networking Academy

✓ Completed

IT Support Professional
Google Certificate

✓ Completed

BUILT BY ME

Projects

Python Networking

Network Connectivity Troubleshooter

CLI tool for DNS resolution, ping tests, and port checks (HTTP, HTTPS, SSH, RDP). Mirrors real-world Azure cloud support diagnostic workflows.

[View on GitHub →](#)

Bash Sysadmin

Active Directory Simulation

Automates user/group creation, assignment, and account management — demonstrating Azure identity and access management concepts.

[View on GitHub →](#)

Python Monitoring

System Health Monitor

Monitors CPU, memory, disk, and network config. Applicable to cloud resource monitoring and proactive Azure support tasks.

[View on GitHub →](#)

Python OOP

IT Support Ticket System

Full help desk ticketing workflow — create, update, assign, and track tickets simulating real service desk operations.

[View on GitHub →](#)

Full-stack

E-Commerce App

Full-stack application demonstrating web development, backend logic, and database management.

[View on GitHub →](#)

Backend API

SilkenSoft Backend

Backend system covering API design, server management, and data handling for a real-world software project.

[View on GitHub →](#)

BACKGROUND

Experience & Education

Jan – Aug 2022

IT Trainee

Creative Software · Sri Lanka

- Resolved tickets across Windows OS, hardware, and networking
 - Supported software installs, device configs, and network troubleshooting
 - Communicated technical solutions clearly to non-technical users
-

2023 – Present

Care Assistant (Night)

MHA

- Works independently with high responsibility under pressure
 - Maintains accurate documentation and compliance reporting
 - Collaborates effectively across multidisciplinary teams
-

2020 – 2023

Sales Assistant

Sports Direct

- Customer problem resolution and interpersonal communication
 - Fast-paced team environment, consistently meeting targets
-

2025

BSc (Hons) Computer Science

University of Hertfordshire

- Graduated 2025 · Software engineering, networking, and systems focus
